

Fire Service Occupational Cancer Seminar

TUESDAY, SEPTEMBER 10, 2019

9:00 AM

Presented by: First Responder Center for Excellence

Please join us for this training seminar to learn more about:

- Why and what types of cancers firefighters are at greater risk for
- How you and your department can take simple steps to reduce your exposure
- What you need to know should you get diagnosed with cancer

The dramatic increase in the incidence of occupational cancers is one of the most important problems facing the fire service today. The First Responder Center coordinates the activities of the Fire Service Occupational Cancer Alliance, a collaborative effort among all fire service constituencies to educate personnel about cancer.

Cost of this seminar: **FREE**

Fire Co./Auxiliary/Organization: _____
